<i>by eye base</i>	<i>These states</i>	<i>classified using the classification of aggregates, unclassified using the classification of bases, unclassified using the classification of elements,</i>	<i>under how many aggregates, under how many bases and under how many elements are those states unclassified?</i>	<i>Those states</i>	<i>are unclassified under 4 aggregates, under 2 bases and under 8 elements</i>	
<i>These states are classified using the classification of aggregates, unclassified using the classification of bases, unclassified using classification of the elements, by the eye base.</i>			<i>under how many aggregates, under how many bases and under how many elements are those states unclassified?</i>	<i>Those states are unclassified under 4 aggregates, under 2 bases and under 8 elements</i>		

Method 02 – Type 01 - States classified under the same aggregate but not under the same base or element.

Method 02 – Type 02 - States classified under the same aggregate and base not under the same element.
